SUMMARY

With more than ten years of experience in SAP integration, my career has been strongly focused on enterprise integration platforms, starting with SAP PI and evolving toward cloud-based integration solutions.

In my current role as EU Integration Manager, I lead international teams responsible for defining integration architecture and governance across complex, multinational environments. I work closely with internal stakeholders, external partners, and service providers to ensure scalable, secure, and business-aligned integration solutions.

I firmly believe that successful IT integration starts with strong people integration. For this reason, I place great emphasis on collaboration, leadership, and acting as a reliable point of reference for the teams and stakeholders I work with.

EXPERIENCE

Data Integration - EU Manager

FERRERO S.P.A.

September 2021 - Present, Cuneo , Italia

- Integration leader with responsibility for an international team delivering data integration for the Ferrero Group.
- Accountable for integration architecture and governance across enterprise systems, cloud platforms, and partner ecosystems, with a strong focus on SAP PI/PO and SAP Integration Suite. Driving the transition towards modern, scalable, and secure integration models aligned with business and IT strategy.
- Spearheaded cross-functional collaboration with regional stakeholders to standardize data integration processes, elevating compliance and interoperability across multiple business units.
- Directed migration initiatives for legacy data exchange systems to cloud-based integration solutions, facilitating seamless connectivity and strengthening operational resilience within the Ferrero Group.
